BSc in Speech Language Pathology

A combination of on-campus courses and off-campus supervised clinical training

Upon graduation:

- ❖ Obtain licensure by Ministry of Health to become a Speech-Language Pathologist
- ❖ Become a communication health professional and perform assessment, analyses, and intervention for speech and language disorders
- ❖ Help children and adults build their ability and confidence to express themselves and communicate with others!

For details, curriculum, and admission requirements, visit the program website:

"Nothing is as rewarding as seeing someone become confident in their own voice thanks to you!"

- Amira Badr, class of 2017

"Being a speech-language pathologist is exciting and challenging at the same time. It is a fantastic and fulfilling job for anyone who is passionate about language and who likes to help others."

- Raya Al Nuaimi, class of 2015
